About Me

Hi, I’m Abhishek, a passionate Frontend Web Developer based in Delhi, India, focused on building clean, responsive, and user-friendly websites. work with modern tools such as HTML5, CSS3, JavaScript, React.js, Sass, Vite, and Git. Currently, I am learning Next.js to further enhance my frontend skills. I care deeply about UI/UX, performance, and cross-browser compatibility. I'm always eager to learn new technologies and improve continuously. In my free time, I like exploring tech trends or spending time with family and friends.

Skills

- Skills: HTML, CSS, SASS, JavaScript, Media Queries (Responsive Design)
- Frameworks: Bootstrap, React.js (Vite)
- Libraries: jQuery
- Version Control & CI/CD: Git, GitHub, Basic CI/CD
- Tools: VS Code, Chrome DevTools
- Deployment: Vercel, Netlify

Work

1.

Design Pond – Full Admin-Control Website
Tech Stack: React.js (Vite), Sass, Git/GitHub
Developed the frontend for a fully dynamic and responsive website for a creative agency. Implemented UI components, layouts, and custom media grids (10 sections) to showcase projects effectively. Designed and styled sections for homepage, about, projects, and Coffee Break Stories using React.js and Sass. Collaborated with a backend developer to integrate APIs and ensure seamless data flow between the CMS dashboard and frontend. Optimized the website for performance and responsiveness across desktop, tablet, and mobile devices. Deployed the frontend live, ensuring smooth accessibility and cross-browser compatibility. Followed an Agile workflow, actively participating in sprint planning, client feedback sessions, and feature iterations.

2.

Synergia PAC – Dynamic Corporate Website with Custom CMS
Tech Stack: HTML5, Sass, JavaScript, jQuery, Git/GitHub, Netlify
Developed the frontend for a fully custom-coded corporate website with responsive design and optimized performance. Implemented UI layouts and dynamic sections for Services, Solutions, Industries, Clients, FAQs, and Home/About pages. Created blog and comment system interfaces, enabling users to publish blogs and interact through comments. Styled the entire website using Sass and jQuery for interactivity and animations. Collaborated with a backend developer to integrate APIs and ensure smooth data flow between the CMS dashboard and frontend. Ensured cross-browser compatibility and mobile-first responsiveness across devices.
